Education

McPherson Univerisity

Bachelor of Science in Software Engineering

Oct. 2022 – Present

Seriki-Sotayo, Ogun State CGPA : 4.63

Aptech Computer Education

Certificate of Proficiency in Information Systems Management

Mar. 2018 – Mar. 2019

Ikorodu, Lagos State

Fadh L Omar Comprehensive High School

West African Senior School Certificate

Sept. 2009 – Oct. 2012

Meiran, Lagos State

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Embedded Systems
- Systems Programming
- Software Methodology
- Database Management
- Internet Technology
- Full Stack Development

Experience

Netop Business Systems Limited

Software Engineer Intern

May 2020 – August 2020

Ikeja, Lagos State

- Developed a service to automatically perform a set of unit tests daily on a product in development in order to decrease time needed for team members to identify and fix bugs/issues.
- Incorporated scripts using Python and PowerShell to aggregate XML test results into an organized format and to load the latest build code onto the hardware, so that daily testing can be performed.
- Utilized Jenkins to provide a continuous integration service in order to automate the entire process of loading the latest build code and test files, running the tests, and generating a report of the results once per day.
- Explored ways to visualize and send a daily report of test results to team members using HTML, Javascript, and CSS.

Netop Business Systems Limited

IT Support, Full Stack Web Development Intern

March 2025 – August 2025

Ikeja, Lagos State

- I worked on full IT support that involves various hardware , software , network troubleshooting skills and fast problem solving skills within the organization.
- I worked on a full stack project which is a Visitor Management system using PHP and APACHE HTTP SERVER prebuilt into XAMPP
- I built API endpoints using Django rest framework and i tested API endpoints using postman.
- I also explored the full stack framework of Django and u built an Human Resource Management using Django Template Language and using Models to define different data structures of the system

Projects

Visitor Management System | *HTML, CSS, JavaScript, Bootstrap, PHP*

Mar. 2025

- * Developed a digital visitor check-in and check-out system to replace manual logbooks and improve record accuracy.
- * Implemented secure storage of visitor information using a structured MySQL database.
- * Built an admin dashboard for monitoring visitor logs, tracking access, and generating reports.
- * Deployed using XAMPP and Apache server for local enterprise use.

Airbnb Clone Application | *Next.js, Django REST, PostgreSQL, Docker, WebSockets*

Nov. 2025

- * Designed and developed a full-stack accommodation booking platform supporting real-time interactions.
- * Built responsive frontend using Next.js and TailwindCSS for seamless user experience.
- * Developed scalable REST APIs with Django REST Framework and PostgreSQL.
- * Containerized the application using Docker to ensure portability and consistent deployment.

Human Resource Management System | *Django, Bootstrap*

Aug. 2025

- * Developed a web-based HR system during SIWES for managing staff records and organizational workflows.
- * Designed database models to represent employees, departments, and administrative processes.
- * Implemented dynamic interfaces using Django Template Language and Bootstrap.
- * Deployed the application on Render; later adopted into the departmental archive after review.

Technical Skills

Languages: PHP, Java, C, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, XAMMP, Eclipse, APACHE HTTP SERVER, draw.io, Android Studio, POSTMAN, Docker, Render, Digital Ocean

Technologies/Frameworks:Nextjs, Django, rest_framework, daphne, Django channels, Tailwinds css, bootstrap

Leadership / Extracurricular

McU – New Horizon Techhub

Mar 2024 – Present

Team Leader

McPherson University

- * Led the design and development of a Hostel Allocation Management System to automate student accommodation assignment and eliminate manual allocation processes.
- * Architected the system using Django framework with a structured database to manage student records, hostel capacity, and room assignments.
- * Implemented role-based access for administrators to allocate hostels, monitor occupancy, and generate allocation reports efficiently.
- * Deployed the application for institutional use, improving transparency, reducing allocation time, and minimizing human error in hostel management.
- * Coordinated a small development team, assigned tasks, reviewed code, and ensured successful testing and deployment of the solution.
